

Sport-On *Troublemaker*

SPORT-ON company is a European manufacturer of sports equipment for disabled people.

We break stereotypes and create standards in designs intended for disabled people, which makes our products unique and exceptional. We implement the most unusual ideas turning them into real products.

We take an individual approach to each client to meet the highest expectations.

We have a handbike for you to use in any terrain – road, gravel, but also in mountains!

Troublemaker

The Troublemaker from Sport-On is designed for riders aged 8-14. In its standard version it will provide everything necessary for safe ride on roads, bike paths and even light off-road terrain.

Troublemaker, given its nature, is custom built and can feature virtually any commercially available component, including electric assist. On request, the bike can also feature a wireless electronic remotely operated brake system for a parent or guardian.

The standard Shimano Alfine 8 speed integrated gear hub, allows you to change gear while you're stopped. So a red traffic light at the bottom of a steep climb will no longer be a problem!

Standard features on the Troublemaker
